## ALL HUMANS LIVE ... AND DIE

Most struggle with experiences of loss, death, disappointment and unwanted change.

Some are destroyed, minimized. Some learn. Few are transformed, lifted and inspired by these experiences.

Lisa Jones has learned the many gifts of transformation and inspiration through the experience known as death. Although most of society, religion and family tradition protest otherwise, the untimely passing of her husband Ian was a gift.

Via a Shared-Death Experience (SDE), Lisa was awakened to trust, beauty, possibility and happiness as never before. She is now compelled to share this truth with others.

*"I rely far more on gut instinct than researching huge amounts of statistics."*

— Sir Richard Branson —

Lisa is not a veiled and robed elite goddess seated high on a throne. She is a former high-level CPA, mother of two, suburban, automobile-driving woman raised a traditional Christian.

She still has doubts, old paradigms weigh on her biggest dreams and embarking on a scary new venture still sends chills down her spine. The difference is, Lisa knows what's happening when it happens. A knowing she brings to every client, every audience, every time.
